

### Add/Invite Attendees

#### Basic Course:

The system displays a page of current attendees. The Trip Coordinator can either click "add" to invite a single attendee or "import" to import a list from a third party or csv. Once attendees have been added the list should be updated and displayed to the Trip Coordinator.

#### Alternate Course:

- If an attendee is missing an email or other required contact information, it should not add the attendee to the list, and notify the Trip Coordinator to fix the error.
